MATRIX SELECTION CHART

The technical application data in this document is intended as a basic guideline for the selection of appropriate tools for your job. As drilling conditions and the capabilities of drilling equipment vary considerably from site to site, it is impossible to define absolute parameters for the application of our drilling tools. Some experimentation on the part of the end user may be required as parameters outside of those recommended here may be applicable. Every effort has been made to ensure the accuracy of the data contained in this document.
